A full range of performance-certified cranes, sized for your project and your needs

Competitive Pricing

A 4-hour (not 8-hour) minimum to save you unnecessary costs

In other words, when you work with us, you can expect everything you need to get your project done—safely and professionally, in budget and on time.

WHAT TO EXPECT

from Toledo's Oldest,
Most Experienced
Crane Rental Service

For more than 80 years, Henry Gurtzweiler Inc. has been the choice of commercial contractors, construction firms and manufacturing plants across the region. Our customers demand the best. And they know that—*whatever the project, whatever the scope, whatever the timeline*—we'll do everything possible to meet and exceed their highest expectations.

The Right Response

Same-day turnaround? Not a problem. We can have an appropriately sized crane and a trained operator at your job site almost immediately. And for maximum flexibility, you have the option of renting our cranes and boom trucks by the hour, the day, the week, or the month.

The Right Experience

Our scheduling specialists are experts at what they do, and our friendly, highly skilled crane operators have an average of 20 years of experience. One phone call is all it takes to schedule the job, assign an operator and get your project underway. Within hours, one of our team members will be at your facility or job site to help size the crane. And our technical support staff is ready to provide follow-up, day or night.

The Right Professionals

Our CCO-certified crane operators are the best in the business, bar none. In addition to handling the equipment, they can also advise you on rigging. To assure the highest levels of on-the-job safety, every operator participates in the Drug Free Workplace Program, supervised by the State of Ohio.

The Right Equipment

Whether you need lifting capacity of 10 tons or 100 tons, we've got the right crane for the job. Our well-maintained, regularly updated fleet includes:

- **Boom trucks** featuring 47' of main boom, 18' swingaway jibs and 18' flat beds—ideal for working in tight spaces.,
- A 25-ton **hydraulic rough-terrain crane** designed for muddy sites and long-term projects.
- 24- to 70-ton **hydraulic truck** cranes for concrete jobs and structure erections.
- **Cable cranes**—including a 100-ton Link-Belt and two 65-foot Link-Belt lattice boom cranes.

Every piece of equipment undergoes a yearly third-party safety audit. And as a one-source vendor, we can also provide all the rigging, shackles, picking beams and straps you need to get underway—safely and efficiently. Simply request those items when ordering.

The Right Pricing

Our fee schedule is something else that sets us apart. A 4-hour minimum—unique in this business—assures that you'll never be charged automatically for an 8-hour day. Resulting in better cost control for every project.

THE RIGHT TIME TO CALL.

For a fast, professional, no-obligation quote on your current or future project, call our scheduling supervisor today at:

(419) 729.3955
